

CONCEPTS OF INDEPENDENCE

Special Wishes

Empowering kids with disabilities to live independently

Ava has a GPS device that allows her the freedom and independence to explore her world every day. Tyler uses his iPad to communicate with his family and loved ones. Masha uses a special swing that exercises his legs and body.

These are just some of the wishes granted through Concepts' *Special Wishes* program. Each year, we ask the parents & guardians of Concepts' children to send us a wish for something that would improve their child's life and enhance their freedom and independence. Something they couldn't otherwise attain. Since our program relies on generous donations, today we are asking you to participate.

Help us grant more wishes and give kids life-changing tools of independence!

YES! I want to give children with disabilities the power of independence.

\$500 \$300 \$100 \$50 Other: _____
